IP65

High Transparency

MV Mesh series, as a particular version to the MV series, is made to fit the outdoor fixed and rental LED screen solutions with transparency requirements.

MV Mesh Series features high brightness, high contrast ratio and a high refresh rate, guarantee the output of clear and vivid images visible under any lighting condition. The MV Mesh series is also eco-friendly with an average power consumption of 180w/ m². The super-high transparency design gives it an 8kg lighter cabinet while compared with the MV Series.
